DETAILED ACTION

1. The Amendment filed in Paper No. 9, October 30, 2002 has been received.

According to the Amendment, claims 9, 15, and 25 have been amended and new claims 30-40 have been added. Currently, claims 1-40 are pending in this application.

Acknowledgment has been made.

2. Claims 38-40 are objected to because of the following informalities:

In claim 38, line 1, a colon ":" should be inserted after the word "comprising", and each limitation of the claim must be separated by a semicolon ";".

Note that, the marked version of new claims 38-40 has been mistakenly indicated as claims 39-42.

Appropriate correction is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 34 is vague and indefinite since it depended on itself.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Olsen (6,217,448).

Olsen teaches a video gaming device and method for displaying multi-screen presentations comprising: a plurality of gaming devices (G), each gaming device being adapted to allow a player to play a wagering game, each gaming device being adapted to select a multi-screen presentation and transmit a request for a multi-screen presentation (Fig. 1); a plurality of video, each video display being adapted to display a video presentation, the video displays being positioned in close relative proximity to allow a video presentation to be displayed using the plurality of video displays, wherein the video presentation appears to be an integrated, multi-screen presentation (video display D1-Dn); the game device controller initiates a multi-screen presentation upon detecting a bonus event; a plurality of video displays controllers (video display controllers of gaming machines G) communicating with gaming device and video displays; master video display controller; controller is adapted to select a multi-screen video presentation from a plurality of different presentations; game device controller is

adapted to select a bonus award and a multi-screen video presentation based on the output of a random number generator; a wagering device (G).

7. Applicant's arguments with respect to claims 9-40 have been considered but are moot in view of the new ground(s) of rejection.
